FORENSIC MULTIMEDIA ANALYSIS

Enabling law enforcement
to get actionable information
from digital imagery

Impress
BY FOCLAR

Turning low quality footage into actionable information

Supporting a broad range of input formats, Impress enables you to get valuable information from images and video using the extensive filter collection. Specifically aimed at forensic applications, the software provides the necessary tools to fit law enforcement requirements. By optimizing the workflow within the software, we support the more efficient achievement of results, thus reducing the workload.

- ◆ Modern and intuitive to use interface to get started right away.
- ◆ Acceleration of processing when using a graphics processing unit (GPU).
- ◆ Supporting a wide range of input formats for both images and videos.
- ◆ Smooth navigation and playback, even for heavily compressed files.
- ◆ Responsive and dynamic filters for fast tuning of results.
- ◆ Automatic report generation ensuring reproducibility.

“Everything you need to forensically enhance your images or video the best way possible”
