FORENSIC MULTIMEDIA ANALYSIS

Enabling law enforcement
to get actionable information
from digital imagery

Mandet
BY FOCLAR

We can no longer trust what we see...

Increasing availability of image and video manipulation tools has led in false imagery and information. Mandet provides an easy to use platform which images and video files can be investigated. Traces of manipulation found by applying filters and analysers, extracting metadata or by reviewing file in a hexadecimal viewer. The software enables you to easily collect these traces into one single report to build a case.

- ◆ Easily apply multiple filters and quickly detect deviations in the result overview
- ◆ Supporting a wide range of input formats for both images and videos
- ◆ Side-by-side views for easy comparison of images and videos
- ◆ Dynamic report building and export to multiple formats
- ◆ Modern and intuitive to use interface to get started right away
- ◆ Detecting DeepFakes

extensive toolbox for the forensic authentication and analysis of images and videos"
