TABLEAU IMAGING RESPONSE KIT TX1

TABLEAU IMAGING RESPONSE KIT TX1

The Tableau Imaging Response Kit (IRK) is a portable kit that includes top of the line forensic hardware write blockers, adapters and cables from Tableau. The IRK is perfect for analyzing and acquiring forensic images of almost any hard drive or storage device type. With up to five connection options, this kit offers ultra-fast and convenient access to forensic data.

The IRK TX1 includes Tableau's TX1 latest standalone forensic imager. The TX1's unique features and ever-improving software make it one of the most versatile standalone imagers in the market. Now we've put the power of the TX1 into one ultra-kit. Accompanied by Tableau's top of the line write blockers, the IRK TX1 offers the speed and reliability necessary to forensically image digital data.

BASE KIT CONTENTS
